

# SURFACE CLEANER & SANITISER

CLEANER & SANITISER FOR USE ON HARD SURFACES

## CLEANER SURFACES IMPROVE HYGIENE AND REDUCES OPERATING COST

Over time hard surfaces including those in HVAC&R systems become soiled from dirt, dust, pollen, moisture and other contaminants. Organic and inorganic contaminants increase mould and bacteria growth on all surfaces, leading to poor hygiene. In HVAC&R systems soilage leads to diminished air quality, increased energy consumption and give poor system performance.<sup>ii</sup>
